

**THE CLAIMS:**

Please amend the claims as follows:

Claim 1 (currently amended): A device ~~Device~~ for cooling an object, ~~the device according to the present invention, which comprises~~ comprising:

a deformable sleeve-like body ~~(1) which includes~~ having an inner compartment ~~(3) intended to contact~~ contacting the object and housing a non-freezing cooling liquid; and

an outer compartment ~~(4)~~ surrounding the inner compartment wherein the outer compartment has an exterior surface and an interior surface wherein the interior surface of the outer compartment is adjacent to the inner compartment wherein the outer compartment houses and housing an insulator, wherein the sleeve-like body has a variable inner diameter[[,]] which allows an adjustment ~~thereof~~ of the sleeve-like body to objects having different outer dimensions[[,]] and further wherein the insulator ~~has includes~~ a compressible resilient material[[,]] ~~characterized in that~~ wherein the outer compartment is manufactured of cloth wherein the exterior surface of the outer compartment is permeable to a liquid or a gas having air permeability, and further wherein the cloth is elastic ~~elasticity and water absorption property.~~
